Education

Sinhgad Institute of Technology and Science
BE in Computer Engineering — CGPA: 8.52

2024

Experience

MERN Stack Web Development Intern
Geeks for Geeks

Aug 2024 - Dec 2024

- Completed intensive training and internship on MERN stack development with hands-on experience building scalable web applications, developing full-stack projects, and creating responsive UIs.
- Enhanced skills in JavaScript, React.js, Node.js, MongoDB, and version control tools like Git/GitHub while applying best practices in front-end, back-end, and database integration.

Web Development Intern
CodeClause

Jan 2023 - Feb 2023

- Implemented advanced front-end development techniques using HTML, CSS, JavaScript, and React.js to improve website functionality.
- Designed and optimized responsive web interfaces, resulting in a significant improvement in user experience.

Projects

TravelX App

- Developed a travel journal app using the mern stack for smooth and efficient performance.
- Implemented user authentication, authorization, and profile management for secure access.
- Integrated features such as entry creation, search filters, and an image carousel to enhance user experience.
- Leveraged Context API for streamlined state management across the application.

Article Reader App

- Created a responsive web application for reading and searching articles.
- Implemented Axios for real-time API data fetching and dynamic content updates.
- Added features like article search and pagination for improved usability and navigation.
